

One Click Metal with new reseller Decip now also available in France

Tamm, 06.10.2021 – The system supplier for metal 3D printing systems One Click Metal enters a partnership with the French Decip Group. One Click Metal will thus benefit from the partner's extensive expertise, particularly in consulting and finding individualized solutions for its customers.

The new partnership with the company Decip enables One Click Metal to distribute the BOLDseries also in the French region. As a sales and service partner in France, Decip is responsible for all purchases of the metal 3D printing system from One Click Metal there.

On the road to success in the metal 3D printing sector with French family business

Founded in 1979, the French family-owned company aims to always offer competitive, innovative, and strategic solutions to its customers in the machine tool and additive manufacturing sectors for a wide range of industries such as energy, construction, aeronautics, automotive and special machinery. With One Click Metal, they are expanding their portfolio in metal 3D printing to serve the increasing customer needs more holistically especially in terms of user orientation as well as financial investment. The company has been involved in 3D printing technologies since 2008, has continued its training in this field with qualified employees, and was thus able to expand its business field in 2018

with Decip 3D and its own test center, which is dedicated exclusively to additive manufacturing.

With One Click Metal, they are expanding their portfolio in addition to polymer and copper in metal 3D printing to be able to serve the increasing customer needs more holistically, especially in terms of user orientation as well as financial investment. With over 40 years of experience, Decip as well as Decip 3D with 13 years of experience in 3D printing offer a broad network of distributors and customers as well as in-depth technical expertise, enabling individual consulting for each customer.

One of One Click Metal's main target groups, in addition to educational institutions and universities, are above all SMEs, to provide these companies with faster and easier access to metal 3D printing technologies. Decip's broad target groups - manufacturers, corporations, micro-enterprises, and SMEs - form an optimal intersection with which One Click Metal and Decip can comprehensively address and serve the needs of the French market.

First trade show appearance in France still in October 2021 in Toulouse

From October 19 to 21, 2021, Decip will be present with One Click Metal's BOLDseries system at the Siane exhibition in the new Expo Park in Toulouse. There, new innovative technologies related to industrial production will be presented. In addition to the metalworking industry, sectors such as automotive engineering, aerospace and medical technology will also be present there. Expected sales start in France for the One Click Metal systems is from the start of the trade show.

About Decip

The family-owned company Decip was founded in 1979 and is based in France, near the Swiss border. Decip consults as well as accompanies companies in the identification and integration of customized solutions in the field of additive machining and manufacturing. They are supported by world-leading machine tool manufacturers.

About One Click Metal

Founded in 2019, One Click Metal is an industrial B2B based in Tamm near Stuttgart. We believe that technologies can be made understandable and usable for everyone. That's why we simplify our product solutions so that anyone can use them successfully. With our metal 3D printing system, we primarily serve small and medium-sized enterprises and thus ensure that metal 3D printing technologies become accessible to the general public. We are working on this with around 20 employees and a lot of motivation.
