

One Click Metal will serve the Italian market with Synergon

Tamm, 01.10.2021 - The BOLDseries of the system supplier for metal 3D printing systems One Click Metal will in future also be available in Italy. This is made possible by the new partnership with the Italian company Synergon. One Click Metal can rely here on an industry expert with many years of experience.

Synergon, a company with many years of experience, serves machine tools in Italy as the representative of Index. Through the new partnership with One Click Metal and its BOLDseries, Synergon is expanding its portfolio in powder bed-based metal 3D printing to meet the high demand in the Italian region with an easy and cost-effective entry. One Click Metal and the Italian industrial expert, based in Milan, know the requirements of industrial customers and can therefore provide them with an easy and successful entry into the technology.

Synergon becomes sales and service partner in Italy

Through the partnership with One Click Metal, Synergon becomes a sales and service partner in Italy. The BOLDseries from the metal 3D printing manufacturer based near Stuttgart will thus be available in Italy from the Milan-based industrial expert. The laser powder bed fusion process of the BOLDseries enables the profitable realization of components from a wide range of application fields and is therefore ideal for various Italian customers of Synergon.

Index is a joint partner

Synergon and One Click Metal have a common partner in Index. Since March 2021 Index is the main investor of One Click Metal, Synergon is one of the oldest resellers of Index and since then can benefit from the quality and experience of the German based company. Italian customers of One Click Metal machines can therefore expect high quality in sales and service from Synergon.

At the beginning of October, One Click Metal will present its BOLDseries on a partner booth with Index at the EMO in Milan, the world's largest trade fair for metalworking. There, visitors can experience technology live and have interesting discussions with manufacturers and suppliers of the metalworking industry.

About One Click Metal

Founded in 2019, One Click Metal is an industrial B2B based in Tamm near Stuttgart. We believe that technologies can be made understandable and usable for everyone. That's why we simplify our product solutions so that anyone can use them successfully. With our metal 3D printing system, we primarily serve small and medium-sized enterprises and thus ensure that metal 3D printing technologies become accessible to the general public. We are working on this with around 20 employees and a lot of motivation.

About Synergon

Synergon was founded in 1985 as the exclusive representative of well-known machine tool manufacturers for Italy. In addition to supplying machine tools, the Italian company offers other services. These include courses on programming, use and maintenance of the machines or after-sales technical support.
